REASONS FOR ALLOWANCE

1. Claims 1-13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "an astrometry first telescope having first and second sightlines respectively corresponding to first and second fields of view, a first star detector system in a first focal plane, first optical means adapted to combine first and second light beams from stars in said first and second fields of view and substantially parallel to said first and second sightlines and deliver them to said first star detector system, a second telescope having a third sightline substantially parallel to one of said first and second sightlines, a second star detector in at least one second focal plane, second optical means adapted to collect a third light beam from said stars substantially parallel to said third sightline and deliver it to said second star detector" as set forth in the claimed combination. Claims 2-13 are also allowable based upon their dependence on claim 1.

The prior art of record, Jaffe et al US 3,100,264 teaches a star identification system a telescope system and optical means to deliver light beams to the telescope system but does not teach a first telescope having first and second sightlines corresponding to first and second fields of view nor a second telescope having a third sightline substantially parallel to one of said first and second sightlines and detectors for both the first and second telescopes and there is no motivation or teaching to modify this difference as derived. second telescope with a second field of view but does not teach a first telescope having first and second sightlines corresponding to first and second fields of view nor a second telescope having a third sightline substantially parallel to one of said first and second sightlines and detectors for both the first and second telescopes and there is no motivation or teaching to modify this difference as derived.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
